

Appendix 5

Decisions of RIEW Varna for construction of windfarms under its Jurisdiction (Varna and Dobrich Districts)

(Source: RIEW Varna – internet site and official response to BSPB access to information request; Kavarna Municipality – internet site; the Government report to Bem Convention since August 2008 – for the 10-turbines project of Borko Ltd, granted in 2008, for which there is no other information is available)

Summary

371 projects for a total of 924 wind turbines, plus 2 projects for an unspecified number of wind turbines approved without EIA and 18 projects for an unspecified number of wind turbines planned (according information in Kavarna and Shabla Municipality), but for which no information is provided by RIEW Varna. Only in Coastal Dobrudzha (Kavarna, Balchik and Shabla Municipality) the total number of wind turbines is 702.

Overview of consents granted 2003-2008

- Consents have been granted for 789 turbines (371 projects)
- Consents have been granted for a further 2 projects where the number of turbines has not been specified (so at least 2 turbines)
- Based on the above figures there are at least 791 turbines consented (373 projects)

- Further there are 18 projects for an unspecified number of turbines where there is no information whether EIA procedure is started

Turbines consented per year:

- 2003 – 13 turbines [EIA for 1 project of 12 turbines, the other turbine consented without EIA]
- 2004 – 16 turbines [EIA – for 1 project of 7 turbines; the other turbines consented without EIA]
- 2005 – 190 turbines [EIA for 3 projects for – 35, 32, 1 turbines; the other turbines consented without EIA]
- 2006 – 113 turbines (+ 1 project where the number of turbines was not specified) [EIA for 1 project of 7 turbines]
- 2007 – 347 turbines (+ 1 project where the number of turbines was not specified) [EIA for 2 projects for - 53, 32 turbines]
- 2008 – 110 turbines [EIA – for 1 project of 10 turbines]
- Based on the above at least 600 turbines consented without EIA and 189 (8 projects) consented with EIA

EIA procedures currently underway, initiated in:

2003 – 1 project (7 turbines)

2004 – 1 project (13 turbines)

2006 – 7 projects (3,7,2,1,1,6 & 1 turbines ie a total of 21 turbines)

2007 – 6 projects (3,2,2,1,1 & 87 turbines ie a total of 96 turbines)

Based on the above there are 15 EIA procedures currently underway for 137 turbines (four of them were proposed again to RIEW Varna and has been consented without EIA in 2007)

Consents granted & EIA procedures underway for turbines in IBAs:

- Kaliakra IBA – consents granted for a total of 173 turbines in the IBA plus a further 2 turbines at the IBA boundary; 38 turbines currently subject to EIA procedures – in total 212 turbines
- Balchik IBA – consent granted for 12 turbines in IBA. It appears that a recently consent has been granted for a further 4 turbines in the IBA – BSPB are trying to verify the exact location of this project)
- Batova IBA – consent granted for 1 turbine in the IBA; 8 turbines currently subject to EIA procedures

Full information
